

Netbiokem DSAM – A Modern Disinfectant to a Modern Problem

Netbiokem DSAM

Netbiokem DSAM - A Modern Disinfectant to a Modern Problem

Advantages of Netbiokem

New Generation Amine – Hospital Grade Disinfectant

Safe on machine and material (non reactive to metals)

Lowest contact time to destroy virus (5 minutes)

Tested against the Virucidal Effectiveness European Standard EN 14476.

Effective for bacterial, fungi and Lipophilic Viruses such as Corona Virus.

Ready to use, hence uniform concentration throughout spraying.

Water based, can be applied through sprayer or fogger.

**DISINFECT YOUR
WORKPLACE**

HOSPITAL GRADE DISINFECTANT

**Netbiokem
DSAM**

Callington 

1 Litre / 20 Litre / 200 Litre

Kills 99.99%
of most harmful
bacteria, fungi
and viruses

Ready to use water based formulation
Safe on men, machine and material

Fogging of Cars using Netbiokem

- On an average **50ml of Netbiokem** is required for a Sedan when fogged, since fogging gives a very small particle size **<50 μ** and spreads quickly.
- An Entire car can be Fogged in **less than 10mins.**
- The active on the surface kills the virus in **less than 5 mins.**
- Fogging doesn't require wiping.
- Fogging covers all hidden areas (Under seat, Door pockets, Boot-space) & areas which are generally difficult to cover by spraying or wiping.
- Once Fogged, keep the windows and doors closed for 10mins for maximum efficacy.
- After that you can keep the windows open for another 5mins (Aerate) to remove the odour of the Disinfectant, before handing over the vehicle to the customer.

Wiping of Cars using Netbiokem (Alternative Method)

- Netbiokem can be used by spraying and wiping with a microfiber cloth. You can also apply on the microfiber cloth and wipe.
- The above can be done in places where human touch is inevitable (steering, switches, horn, door handle, window knobs, gear shifter, hand-brakes, seats, seat belts).
- It is not required to apply on the floors / glasses.
- The active on the surface kills the virus in **less than 5 mins.**
- This is quick and ideal for disinfection of the cars post Test Drives or while receiving the cars for service to protect your service advisors and technicians.
- After wiping you can keep the windows open (Aerate) for another 5mins to remove the odour of the Disinfectant.

Netbiokem DSAM - A Modern Disinfectant to a Modern Problem

Consumption and Time

Description / Area in cu. mtr	Recommended method	Duration	Consumption	Cost Per Car including labour	Price to Customer
Sedan Car / 5 Cu.Mtr	Fogging	<20mins	50ml (per car)	Less than Rs.100 (@ an average 3 cars per manhour)	Rs.500/- (Indicative Price)

Material & Equipment Cost

Description	Qty	Rate	GST	GST Value	Net Price	Cost Per ml
NETBIOKEM 1 Ltr Trigger Spray	1 No	897.46	18%	161.54	1059/-	Rs.1.05/-
NETBIOKEM 20 Ltrs Can	1 No	11,435.59	18%	2058.40	13,494/-	Rs.0.67/-
ASPEY Avenger (Disinfectant Fogging Machine)	1 No	26,813.00	12%	3,217.56	30,030.56	

The above is an estimate based on our understanding and experience with the product

Netbiokem DSAM - *Application Procedure & Safety Precautions*

Do's

- Wear Goggles, gloves and mask
- Water based formulation and hence 100 % safe
- Can be applied by spray and wipe or through fogging machine
- Apply on all surfaces
- Particularly on surfaces where human contact is inevitable
- E:g - steering, switches, horn, door handle, window knobs, gear shifter, hand brakes, seats, seat belts etc.,
- Suitable to be applied on fabric, polymer surfaces etc.,
- For electrical switches, apply Netbiokem on a cloth and use that cloth to disinfect the electrical switches
- If by sprayer, wait for 5 minutes and wipe with a clean cloth
- If by fogger, wiping not required
- Wash the hands after application

Dont's

- Don't spray directly on food items, water bottles
- Don't spray directly on electrical points
- Keep the room open and well-ventilated during spray
- Avoid crowds during spraying
- Don't spray on humans
- Store safely
- Avoid wastage by spraying in excess or repeat spray

Disinfect = Protect
